

I listen regularly to K-Love (91.9 FM) radio station. I am concerned that the expansion of the LPFM service would take priority over the K-Love translator service and leave me without my favorite radio station. Please, please, please don't take away my opportunity to listen to K-Love. K-love provides positive, encouraging music that is appropriate for all ages. My children sing the songs as we travel in the car and so do I. I believe in the positive benefits this station provides enough to support K-love with a monthly pledge and I have been doing so for several years.

I am so thankful to have a radio station that plays encouraging music which helps us get through these busy and troubled times. Many of my friends in the community feel the same way. The K-Love music and staff regularly help troubled listeners. The music has spoken to many hearts and in a number of cases saved lives of those who were contemplating suicide.

K-Love announces local activities and concerts that would be of interest to their listeners. Our community needs more radio stations like K-Love that are there to lift their listeners up rather than tear them down. Please do not expand LPFM to the point that K-Love will no longer be available to my family and my community. Thank you for considering my comments.
